

Amendments to the Claims:

Please amend claim 9.

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.-8. (Cancelled)

9. (Currently Amended) A method of eliciting or enhancing a T cell response to a human self tumor antigen, consisting of immunizing a human being with a composition consisting ~~essentially~~ of a protein or portion thereof with an amino acid sequence native to a non-human source, wherein the non-human protein or portion thereof has at least 80% amino acid sequence homology to the human self tumor antigen but is not identical in amino acid sequence to the human antigen, and wherein the human self tumor antigen is human prostatic acid phosphatase (PAP).

10. (Cancelled)

11. (Previously Presented) The method of claim 9 wherein the composition further includes a pharmaceutically acceptable carrier or diluent.

12. (Previously Presented) The method of claim 9 or 11 wherein the composition further includes an adjuvant.
